

Pharmaceutical Facilities

Concept, Design and Turnkey Delivery

Exyte – plant design and construction

Exyte is a global leader in design, engineering and construction in the life sciences industry with a special expertise in controlled and regulated environments. With great teamwork our experienced specialists develop 'state-of-the-art' solutions for customers' pharmaceutical facilities – from consulting, concept and design to full turnkey project realisation including qualification and validation.

Integrated project delivery

Are you seeking a complete package or an individual solution? For us at Exyte it doesn't matter if we are dealing with a small reconstruction job or a full turnkey realisation – we ensure smooth project execution in any case. Integrated project teams develop tailor-made individual as well as complete solutions and implement them with high quality. This means that your project – no matter the size – will always benefit from a broad network of experts and shared best practices, making sure your job gets done on time and within budget.

Pharmaceutical Facilities

Expertise for your GMP-Compliant Manufacturing Process

Project execution – high quality on time and within budget

Our specialised knowledge and customer-oriented project management supports you from the early concept to full commissioning of pharmaceutical plants of all sizes.

From manufacturing pharmacies and GMP areas in clinics to an entire pharmaceutical production plant – our experienced specialists provide continuous support for the expansion of your facility, optimisation of existing production areas also during running production as well as for a new production site.

We have a strong track record over many years of partnering with the pharmaceutical industry, backed by a thorough understanding of the manufacture of all current dosage forms

and medical products. Does your manufacturing process focuses on API synthesis, Fill & Finish, solids production, containment or on products for personalised medicine? At Exyte, we plan and realise your project reliably and compliant with international market conditions and regulations such as GMP or FDA.

How you benefit

- Implemented Exyte quality management
- Realisation during ongoing operation
- Flexibility and cost optimisation
- Highly efficient processes
- High plant availability
- Customised plants

Expertise for your project

Consulting

Concept development/Study benchmarking
EU-GMP/FDA consulting
Fast-track module construction vs. solid construction

Qualification & Validation

DQ/IQ/OQ of pharmaceutical process plants
Risk analyses
Computer system validation (CSV)
Cleaning validation

Planning and Realisation

General or individual planning
Process technology/Pure media
Clean room technology
Architecture & construction
Building services
Laboratory technology

Building Services

Plant infrastructure
Cleanroom & ventilation technology
Media supply
Building control systems/monitoring
Logistics and storage technology
