Exyte demonstrated its High-tech Facility Solutions at IC World 2019 in Beijing, China

Shanghai, December 2019: Exyte, the global leader in the design, engineering and construction of high-tech facilities, plants and factories, demonstrated its high-tech facility solutions at IC World 2019 in Beijing, China, from 28 to 30 November, 2019. Exyte China acted as an exhibitor sharing with around 300 visitors about Exyte's latest Smart Fab and BIM solutions during the 3 days' exhibition period.

With the theme of "creating core ecology, to promote a new leap", IC World 2019 aimed to host a leading grand industrial gathering in China and provide suggestions for the development of the integrated circuit industry in Beijing. This was the second year that Exyte participated at IC World. Exyte was exhibiting as one of the key global suppliers in the semiconductor industry, demonstrating their latest technologies. Exyte China has been active in mainland China since 1995 with over 300 projects implemented, and has built a strong trusted relationship with its clients and partners. Next year, Exyte China will welcome its 25th anniversary of being officially located in Shanghai, China.

Exyte booth at IC World 2019

Delivering Best-in-Class Solutions for High-Tech Facilities

Exyte China presented its high-tech solutions in delivering Advanced Technology Facilities (ATF) solutions at IC World 2019. ATF is one of Exyte's global business units. Exyte delivers complete design and building solutions across multiple industries worldwide for over 100 years. Exyte's full range of services, from design through implementation, ensure that client's high-tech facilities are completed on time and within budget according to both current industry standards as well as considering future technology roadmaps.

Frank Lorenzetto, Managing Director of Exyte China, said: "As a global leader for the delivery of high-tech facilities, Exyte serves clients with a high standard of safety and quality, and is widely recognized by domestic and international clients. Due to the demand for a more digitalized approach for today's industry, we strive to be the partner of choice for our clients providing high-tech facility solutions in China."

Besides their commitment of serving the full spectrum of services with deep expertise and innovation, at the same time, Exyte also delivered high-potential advanced technology to their most technically demanding clients. At IC World 2019, Exyte China showcased its state-of-the-art solutions – Smart Fab and BIM (Building Information Management). The Smart Fab concept is an evolution beyond today's typical approach of the optimization of CAPEX, speed and quality during design and construction, while intelligent BIM Model is a core component of Exyte's digitalization approach to delivering high-tech facilities. It is predicated that by playing the key role in industry, these two significant technologies can help clients meet enhanced quality and safety standards and improve operational excellence.

About Exyte

Exyte is a global leader in the design, engineering and delivery of facilities for high-tech industries. With a history of more than 100 years, the company has developed a unique expertise in controlled and regulated environments. Exyte has a truly global footprint, serving the most technically demanding clients in markets such as semiconductors, batteries, pharmaceuticals, biotechnology and data centers. The company offers a full range of services from consulting to the managing of turnkey solutions – delivered to the highest quality and safety standards. Solving the most complex challenges, Exyte forges trusted, long-lasting relationships with its clients. In 2018, Exyte generated sales of EUR 3.5 billion with over 5,600 highly experienced and motivated employees. The company is ideally positioned to further strengthen its market leadership with its broad industry insight and its exceptional talents. www.exyte.net
